Aspect degrees refer to the angles between placements (planets or points) within 5-10°

- Conjunction less than 5 to 10° apart** - energies mingle, significations express themselves simultaneously
- Semisextile 30°** – a new but unclear beginning, pursue with curiosity, a new seed sprouts but plant is unknown
- Sextile 60°** - a free-will choice to use the energies together once you realize what they are, a learning opportunity
- Quincunx 72°** - placements combine to bestow a creative ability that others don't have, a unique skill or talent
- Square 90°** - placements combine via challenges that make you stronger, view difficulties as the personal growth gym
- Trine 120°** - a smooth and easy flow of energy, placements work seamlessly together, a natural often unconscious gift
- Inconjunct 150°** - placements work together but it's unclear how, trust in the outcome as you act on each, a blind spot
- Opposition 180°** - placements create obstacles for each other, alternate between the two, a teeter-totter or see saw
